**ENGINEERING
EXCELLENCE
SINCE 1932**

P&B Weir Electrical Ltd. (PBwel)

The origins of P&B Weir Electrical Ltd. (PBwel) go back to 1932 when Mr Price and Mr Belsham established P&B Engineering. With its roots firmly established as an engineering company, the business has gone through many changes and passed many milestones over the years.

With a heritage spanning over 80 years, P&B Weir Electrical Limited (PBwel) is recognised globally as a Designer, Manufacturer and Supplier of temporary portable earthing, voltage detectors, Buchholz Relays and electrical safety equipment.

PBwel has developed extensive experience in designing tailored solutions to meet the needs and requirements of our end users working within the Electrical Supply Industry and Rail sectors in the UK and our products have been proven and tested around the world. We have worked closely with some of the UK's biggest household names such as National Grid, Network Rail and all of the DNOs such as Scottish Power.

Our design capability is supported by our manufacturing facility in Corsham where we use cutting-edge technology and highly skilled engineers to ensure all of our products are of the highest quality to provide absolute safety for our customers.

The latest exciting development for PBwel occurred in April 2018 when the business was acquired by the Novarc Group and joined their Electrical Safety Products division (ESP). With values aligned to those of Novarc/ESP, they saw a great opportunity to put PBwel on a new and dynamic growth path by being able to bring a broader product range to the UK market.

Our products have been proven and tested worldwide with an excellent track record and performance across many sectors and industries.

Our Services

Manufacturing & Bespoke Design

Our products have been proven and tested worldwide with an excellent track record and performance across many sectors at PBwel. We design and manufacture our entire product range at our state-of-the-art facility in Corsham, Wiltshire. We do this by utilising a combination of cutting-edge technology and skilled engineers. In addition, PBwel has stringent quality procedures which ensure all of our products are of the highest quality to provide absolute safety for our customers.

As well as providing stand-alone niche products at PBwel, we have also the facility to provide our customers with specialised and highly customised products suitable for various applications and projects, thanks to our experienced engineering team.

With a long-established heritage of engineering excellence, PBwel operates on three fundamental principles;

1. **Quality** drives all that we do in terms of design, manufacture and customer service.
2. **Integrity** ensures that we will always aim to solve customer's solutions without selling any requirement that will be unfit for purpose or unnecessary for the application.
3. **Innovation** is our constant motivation to provide solutions to our customer's needs, from using modern manufacturing methods to demonstrating our product range using VR and 3D printing.

With an in-house bespoke design team PBwel can design and manufacture and fulfil your requirements to an exact specification.

Please get in touch with us for any enquiries today.

Inspection, Repair and Calibration

We recommend that a visual inspection is carried out on all Earths each time before use and in line with your company procedures that govern inspection and testing routines. We do, however, offer a complete Inspection, Test, Repair and Calibration service.

Suppose you return your Earthing Equipment or Voltage Detectors to PBwel. In that case, you have the added assurance that the Original Equipment Manufacturer is performing any test, repair and re-calibration to the same high standards as when the equipment was originally supplied.

As well as offering this service here at our manufacturing site in Corsham, we can also provide a similar service on-site to minimise any shortages of equipment for your teams; it also eliminates time and costs involved in shipping bulky items back to us. Sometimes we are unable to complete all repairs on-site, and these, unfortunately, will need to be returned.

Our Clients

Our products are trusted and tested by some of the leading companies from different sectors such as rail, energy, constructions and more.

P&B Weir Electrical Ltd., Unit 1, Leaffield Way, Leaffield Industrial Est, Corsham, Wiltshire, SN13 9SW.

How to find us

From the motorway head for Chippenham/Corsham on the A350 and then follows signs to Corsham on the A4.
